Result-driven Frontend Developer & UI/UX Designer specializing in building modern, optimized, and scalable web applications. Highly proficient in the React ecosystem, high-performance static architectures using Astro, and serverless integration with Firebase. Passionate about solving complex business problems with clean, intuitive designs and agile, user-centered code.

WORK EXPERIENCE

Founder & Lead Frontend Developer

Clickcito (SaaS) | July 2025 – Present

- Designed and developed a regional digital catalog and directory SaaS platform serving businesses in Misiones.
- Implemented mobile-first frontend architecture, optimizing page loads and mobile-user retention.
- Built robust Firestore and Firebase Authentication integrations for secure, real-time merchant operations.
- Managed the entire product life cycle from UI/UX wireframing to technical deployment strategy.

Freelance Frontend Developer & UI/UX Designer

Independent | April 2025 – Present

- Designed and built custom, high-converting websites and landing pages for local businesses, including elysrestobar.com.
- Created high-fidelity interactive prototypes in Figma and custom vector assets in Adobe Illustrator.
- Leveraged Astro to deliver content-driven sites achieving exceptional Core Web Vitals (SEO, accessibility, and speed).
